FOLDING CHAIR IN NATURAL BEECH

◀ 2

◀ 1

With every project one always has to start again from scratch, as if experience did not exist and one had always been wrong, as if mysterious recesses had hidden the truth.

A single element contained its backrest and rear legs, another the seat, whilst two flexuous armrests joined them to form the front legs.

The chair is made entirely in natural beech. As a planned choice it has not been painted or treated with paints which could have altered the beauty of natural wood. The assembly of single pieces is carefully realised, valuing the continuity of the wood's grains.

Ph. Michele De Lucchi, Luca Tamburlini / Polifemo fotografia (still lifes on white background)

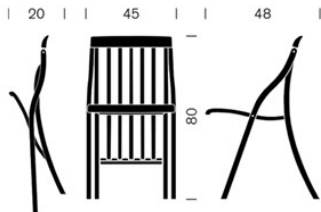

Material / Finishings

Structure:
folding chair in natural beech

Dimensions

W cm 45
D cm 48 open; cm 20 closed
H cm 80
