CUORE APERTO TAVOLO

◀ 1

TRASPARENT BLOWN BOROSILICATE GLASS, CHROME-PAINTED METAL

The lamp is enclosed in a vase.

Looking at reality from a different angle produces unexpected effects.

The table version is a stemless shade: a lamp inside the heart of a vase, in its simplest and most essential form. The ribbed glass shade is not supported by a stem, but by a blown vase in transparent borosilicate glass.

Ph. Michele De Lucchi, Luca Tamburlini / Polifemo fotografia (still lifes on white background)
