MARIANNE LARGE AND MARIANNE MEDIUM BLOWN GLASS

◀ 1

The deepest sea is 10,971 metres. The highest mountain is 8,848 metres. We are in between.

The shape of Marianne vases stems from the freedom of the glass to move inside a steel bladed mould. Depending on the strength of the puff, each vase differs from the next, because every puff is different and drives the glass in different ways through the blades. The vases are made in two versions: transparent and glazed white.

Ph. Michele De Lucchi, Luca Tamburlini / Polifemo fotografia (still lifes on white background)

Material / Finishings

Structure:

blown glass

- *glazed white*

- *transparent*

Dimensions

Marianne Large

ø cm 25

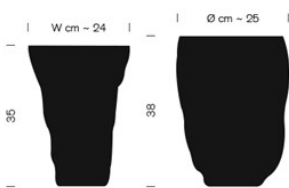

H cm 38
